Subject: RE: west lake response

Mr. Vann:

Good morning! Chuck, thank you for forwarding me the e-mail with Mr. Vann's information and thank you for providing me an overview of the situation! As I indicated, I believe the best approach that we DOE can take is to indicate that EPA is the Lead Federal Agency coordinating with the State of Missouri and that any concerns should be coordinated with them. Please see below for a recommended response to Mr. Anderson and let me know of any changes you believe are needed.

NOTE: This correspondence would be sent from Dr. Albert Wiley, MD, PHD and Director of

REAC/TS one of the DOE/NNSA Emergency Response Assets. He is the one that received Mr. Anderson's e-mail correspondence.

Thank You!

Steve Johnson

Regional Response Coordinator

RAP Region 2

(865) 576-9740

PLEASE NOTE CHANGE IN EMAIL ADDRESS TO:
steven.johnson@science.doe.gov

Mr. Anderson:

Thank you for the e-mail expressing your concerns about the West Lake Landfill site in the St. Louis area and your questions about proposed radiological monitoring and dose measurement methodologies.

The Environmental Protection Agency (EPA) Region 7 office in Kansas City, MO. is the Lead Federal Agency responsible for overseeing long term monitoring of the West Lake Landfill site. I believe it is more appropriate if your questions were addressed by EPA and I would recommend contacting Bradley Vann, Remedial Project Manager at the following number or addresses:

- Bradley Vann - Remedial Project Manager
- U.S. Environmental Protection Agency
- Superfund Division

- o Missouri/Kansas Remedial Branch
- o 11201 Renner Blvd.
- o Lenexa, KS 66219
- o Phone: 913-551-7611
- o Fax: 913-551-9611

Should EPA determine they need the technical expertise of the Department of Energy/National Nuclear Security Administration Emergency Response Assets, we will provide the appropriate support.

Respectfully,

From: Vann, Bradley [<mailto:Vann.Bradley@epa.gov>]

Steve,

I'm attaching a couple of our resource links regarding West Lake too. And Brad's contact information is below. Brad, sounds like Steve is going to craft a reply with information regarding EPA's involvement and/or authority and may want to follow-up with you as needed.
